BcA. JEVGENIJ KAPUSTA

Téma: Tma, voda, 30cm
Název: Futuristická helma

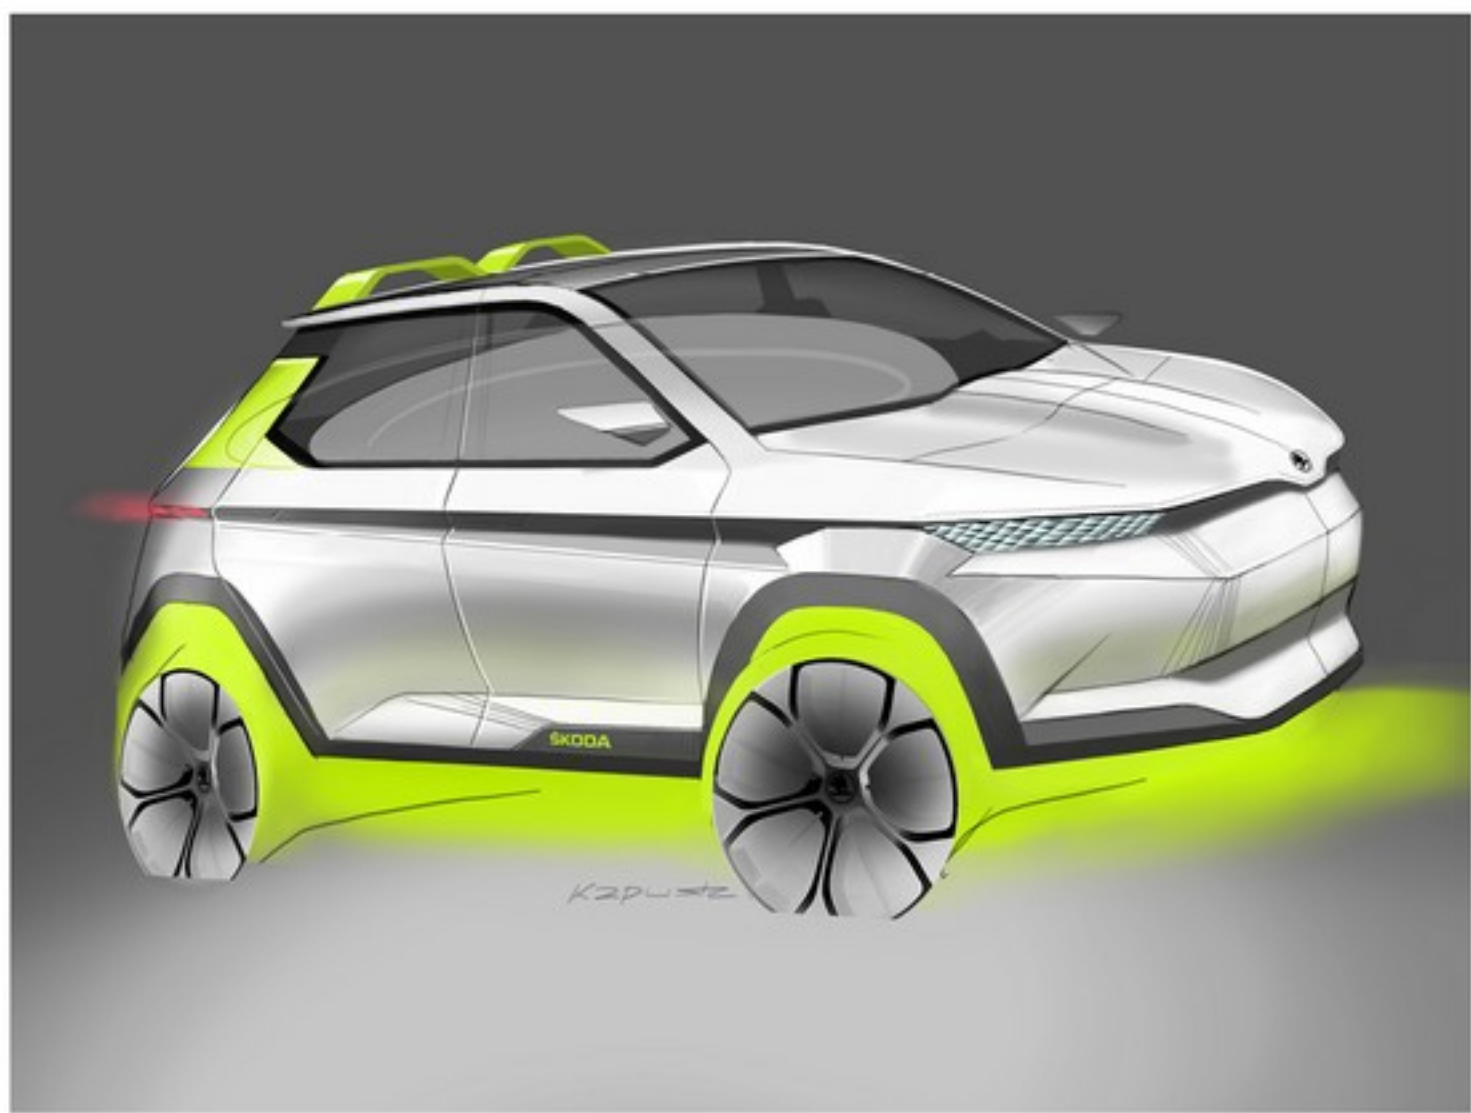

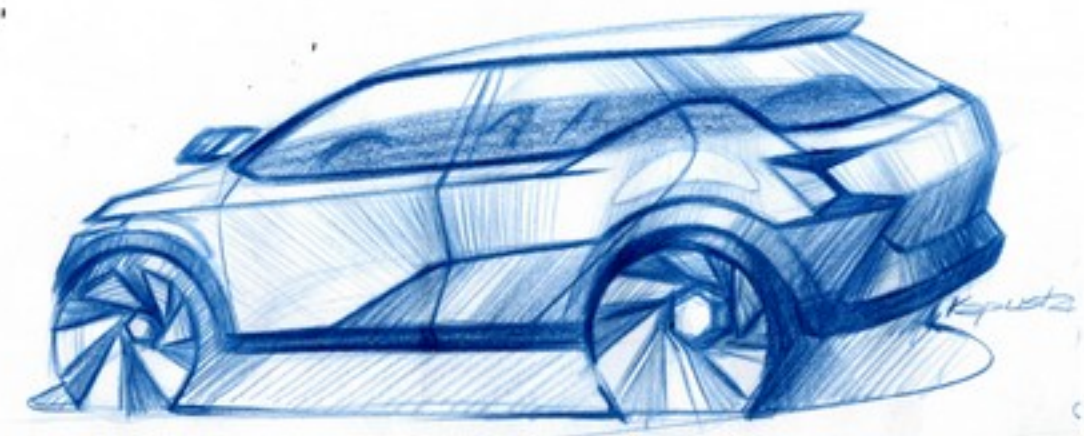

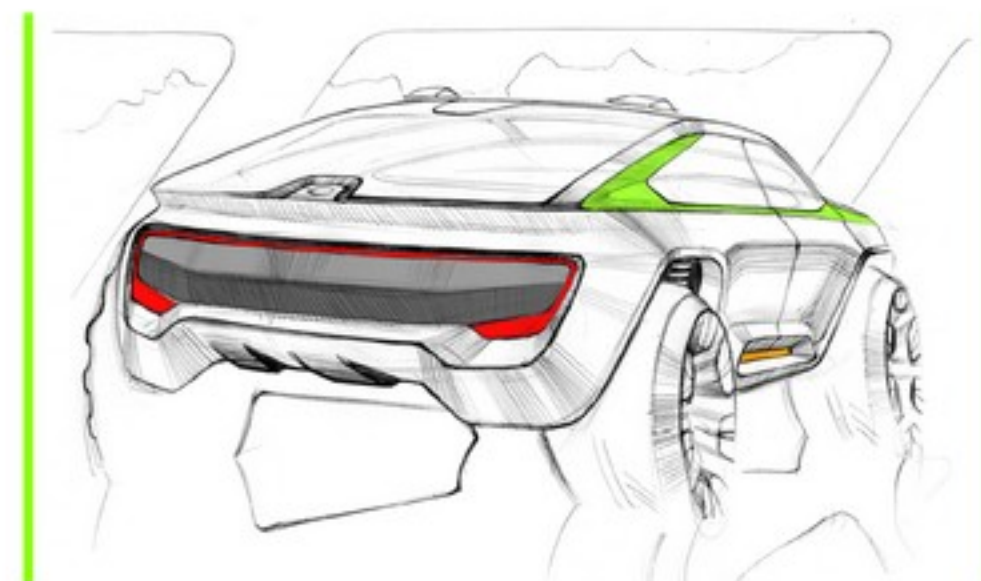

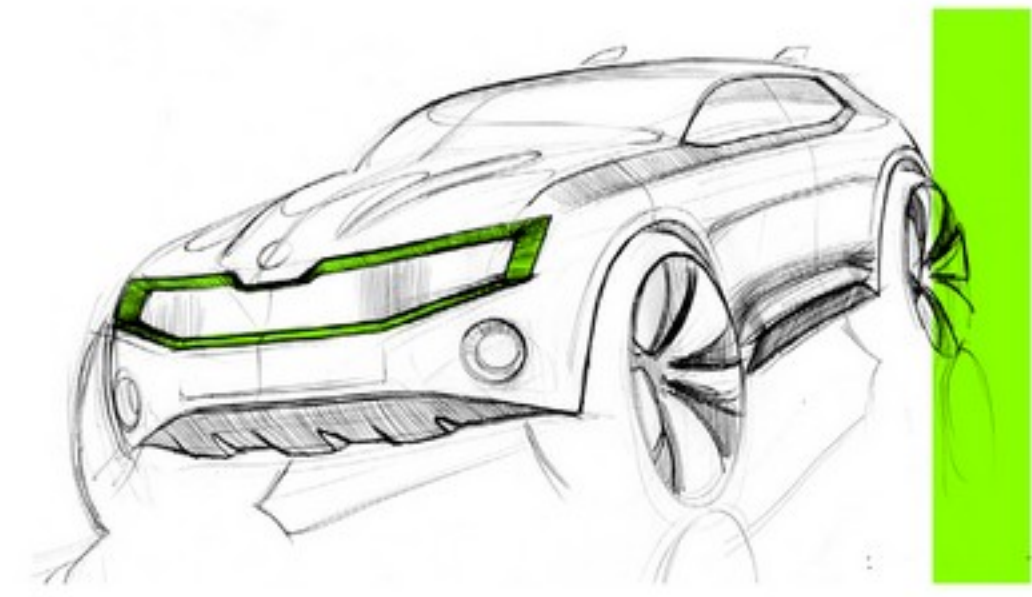

2. ročník MgA.
oboru Design

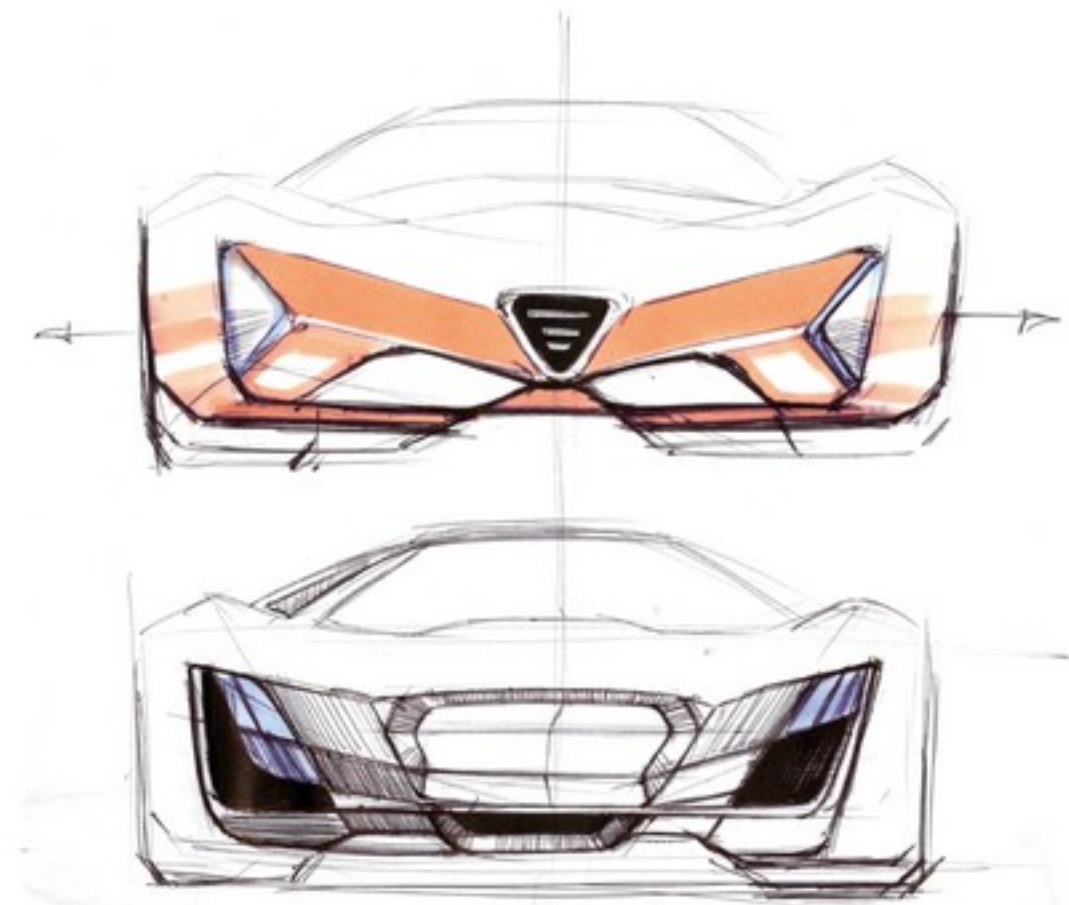

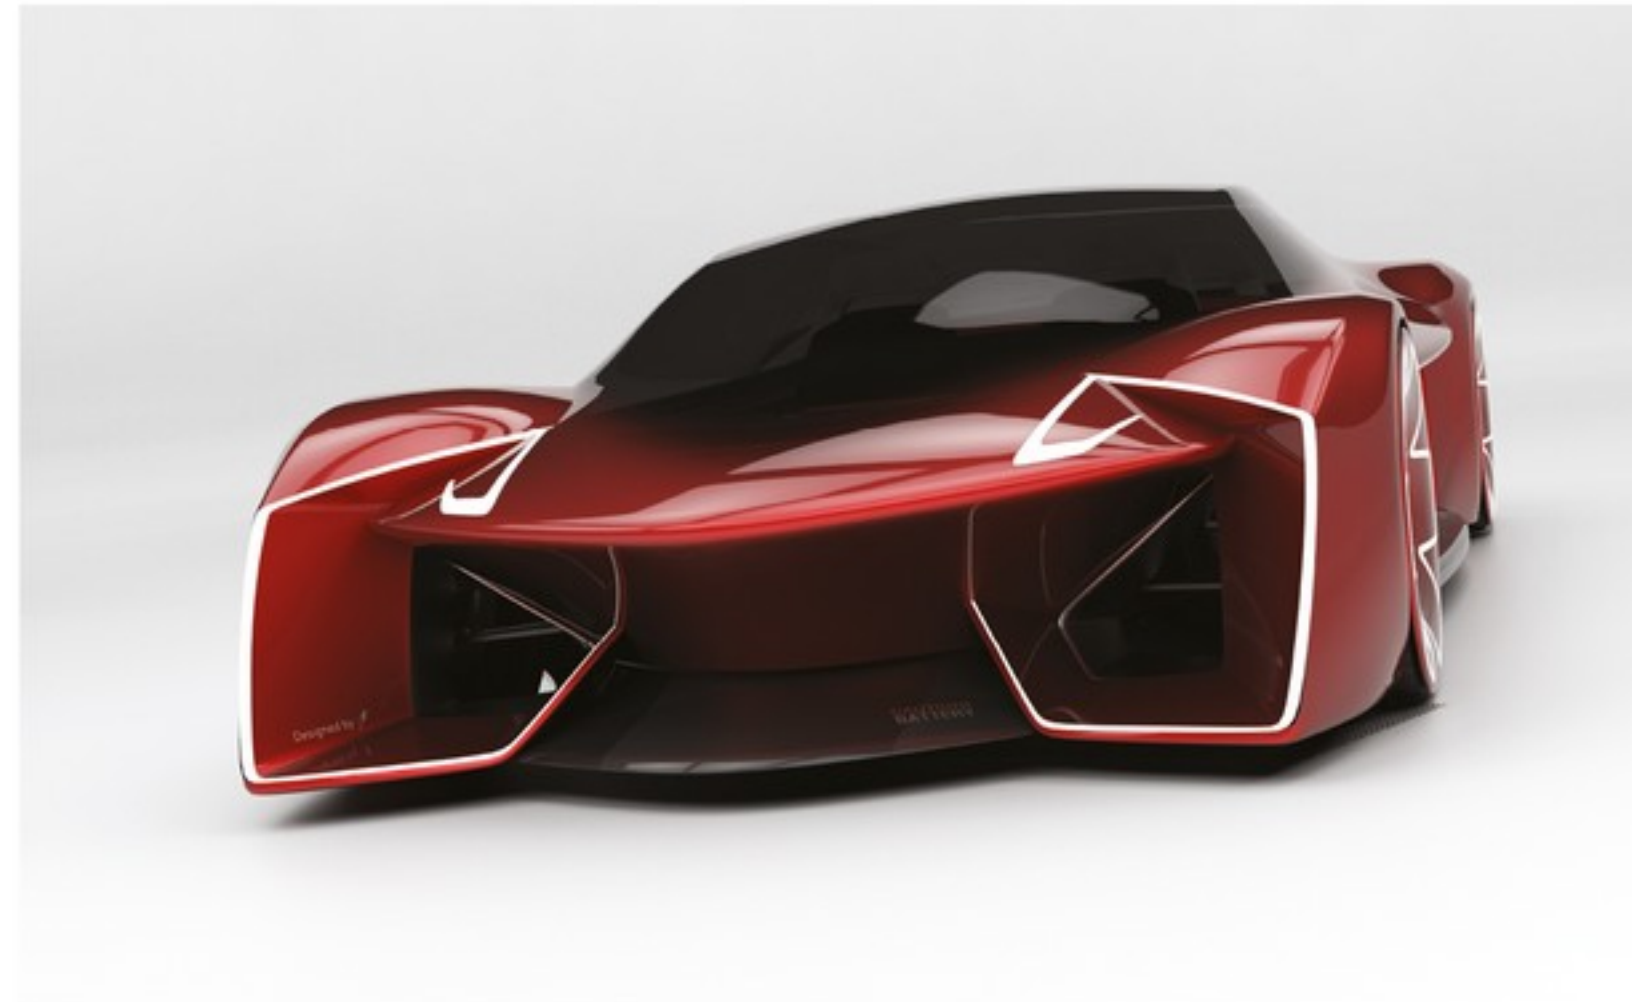

O PROJEKTU

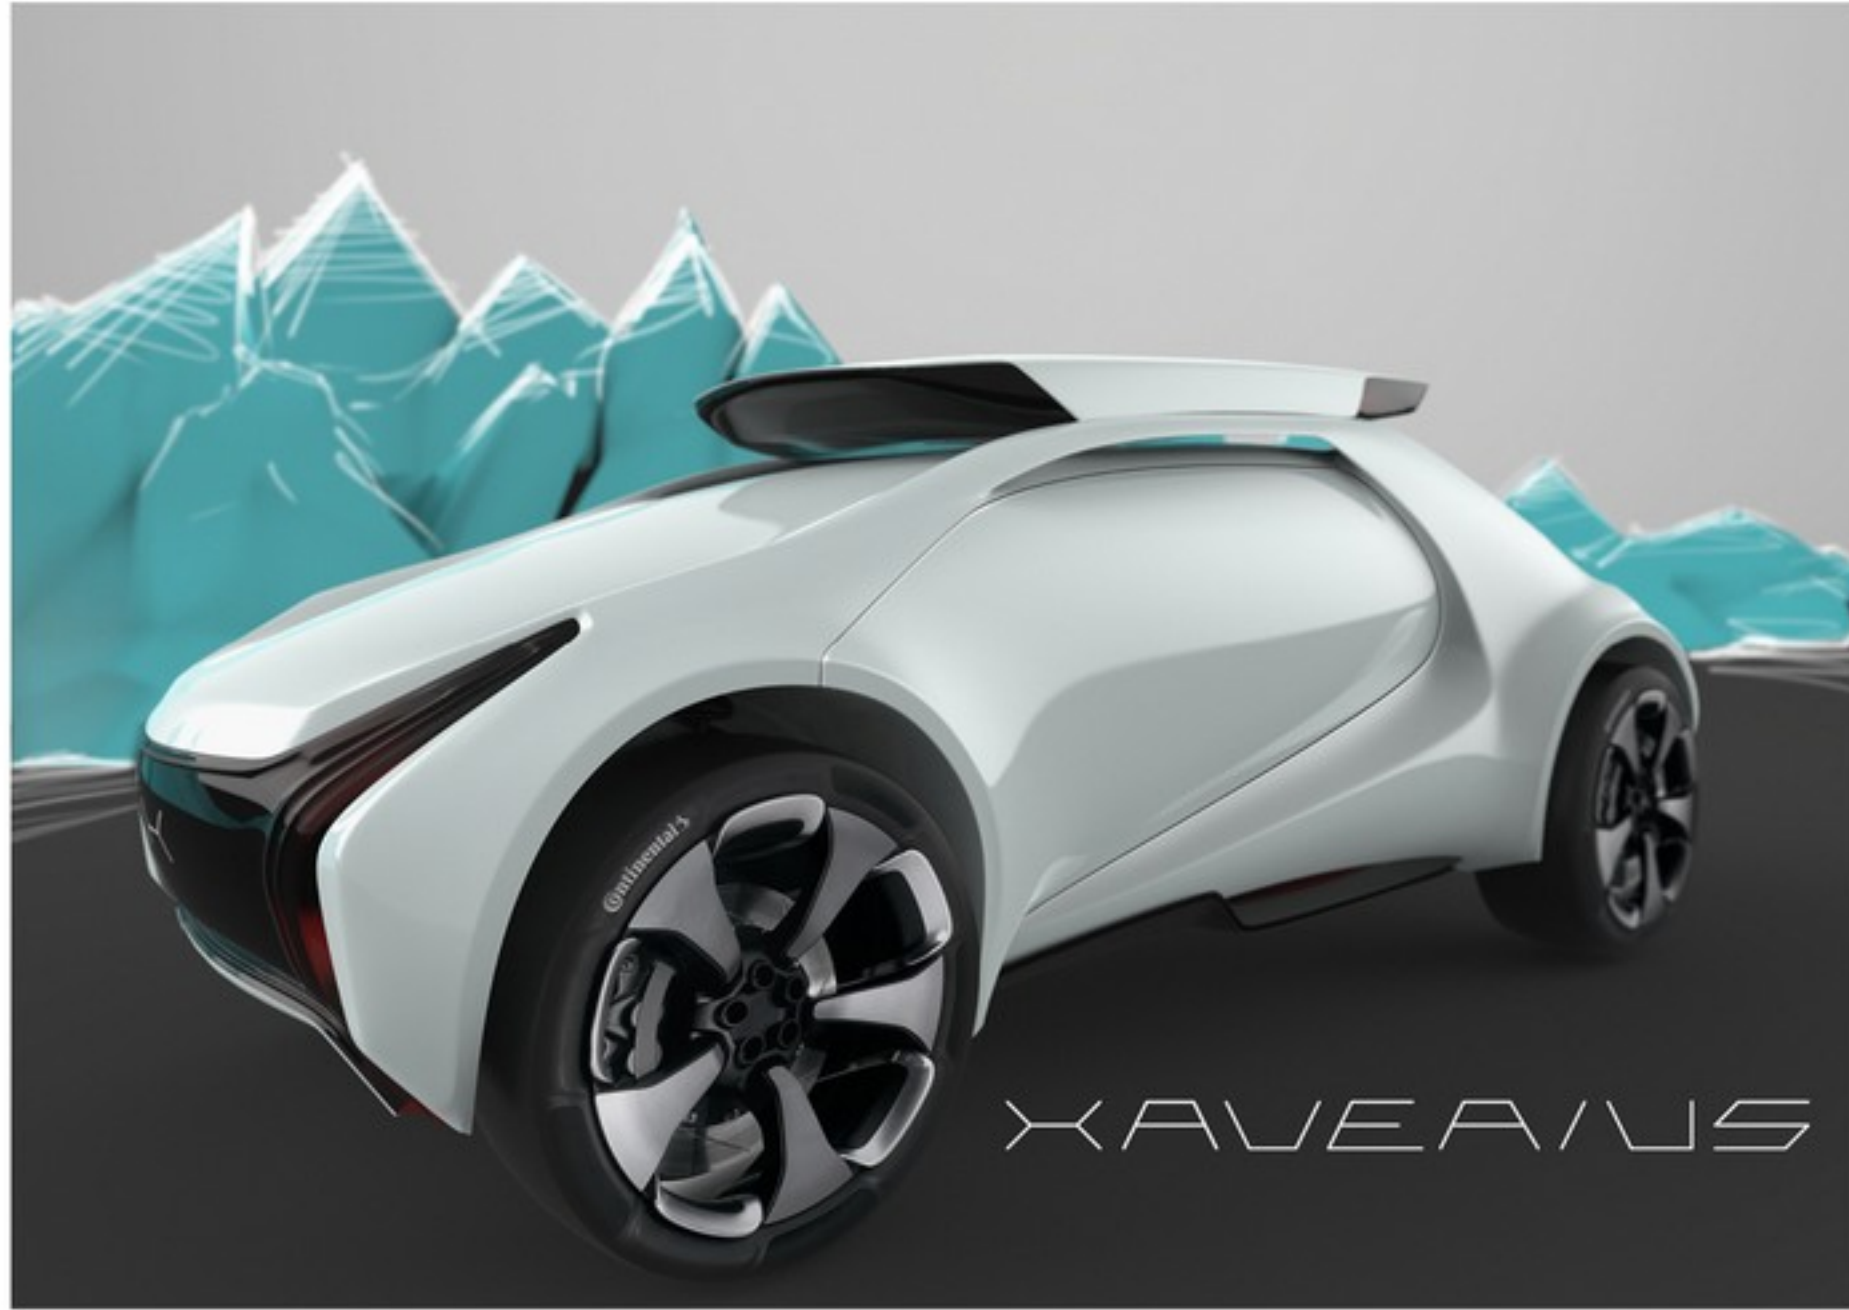

Tuto helmu jsem navrhl s odkazem na filmové prostředí. Proto jsem jí poslal spíše jako hromadu studií.

V teorii se může používat jako ochranná přilba, ale zároveň má aerodynamicky řízené chlazení proti nadměrnému pocení a zároveň helma řídí data ze viděné obrazové informace při jízdě, díky čemuž má zlepšenou reakci.

Dalším využitím je vložení prostředí sítí filmu, kde vojákům napočítá helmy a obrat hřítká se jim proměná do helmy. Teoreticky by tak díky nepřítelům odčítaje klesla úmrtnost vojáků.
